**B.Sc. (E.C.S.) (Semester - I) (NEP CBCS) Examination:
March/April – 2026
OOP'S with C++ - I (G06-0101)**

Max. Marks: 30

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

06

- Constructors cannot be _____.
 - Public
 - Static
 - Virtual
 - Both b and c
- By default data members and member functions of class are _____.
 - Static
 - Public
 - Private
 - Friend
- _____ are the basic runtime in an object oriented system.
 - Class
 - Object
 - Both a and b
 - None of these
- We cannot overload _____ operator.
 - ::
 - >>
 - <<
 - +
- Which of the following approach is adapted by C++?
 - Left-right
 - Right left
 - Top-down
 - Bottom-up
- The operator << is called _____.
 - A get from operator
 - Extraction
 - Insertion operator
 - None of these

06

- Define Algorithm.
- Define Data abstraction.
- Define class and object.
- What is Inline function?
- What is the use of Scope resolution operator?

06

- Explain type casting in C++.
- Explain function overloading with example.
- Write note on nesting of classes.

Q.4 Answer the following questions. (Any Two) **06**

- a) Explain array of objects with example.
- b) Write difference between Procedure Oriented Programming and Object Oriented Programming.
- c) Write a program to check the given number is Armstrong or not.

Q.5 Answer the following question. (Any One) **06**

- a) Write a program to swap two numbers using call by reference.
- b) What is constructor? Explain different types of constructor.
