

2 Marks Questions

Unit I

1. Define **System**.
2. What are the **characteristics of a system**?
3. What is **System Analysis**?
4. Who is a **System Analyst**?
5. Define **Software Engineering**.
6. What are **functional requirements**?
7. What are **non-functional requirements**?
8. List any two **qualities of software**.
9. What is the **Waterfall model**?
10. What is **Agile methodology**?
11. Define **Prototyping model**.
12. What is **fact-finding technique**?
13. What is a **Decision Tree**?
14. What is **Structured English**?

Unit II

15. What is a **Data Flow Diagram (DFD)**?
16. Define **Entity Relationship Diagram (ERD)**.
17. What is a **Data Dictionary**?
18. What is **coding standard**?
19. Define **software testing**.
20. What is **software maintenance**?
21. What is **effort estimation**?
22. What is **input design**?
23. What is **output design**?

3 Marks Questions

Unit I

1. Explain **types of systems**.
2. Write the **role of a System Analyst**.
3. Explain **qualities of good software**.
4. Differentiate between **functional and non-functional requirements**.
5. Explain **Spiral model**.
6. Describe **incremental model**.
7. List and explain **fact-finding techniques**.
8. Explain **Decision Tables**.
9. Compare **Waterfall Model vs Agile Model**

Unit II

10. Describe **components of ER Diagram**.
11. Explain **structured chart**.
12. Write short notes on **coding standards**.
13. Explain **types of software testing**.
14. Describe **conversion methods**.
15. Explain **types of maintenance**.

6 Marks Questions

Unit I

1. Explain **System Development Life Cycle (SDLC)** with phases.
2. Compare **Waterfall, Spiral, and Agile models**.
3. Explain **Prototyping and RAD models** with advantages & disadvantages.
4. Discuss **software requirements** in detail (functional, non-functional, user & system).
5. Explain **fact-finding techniques**.
6. Describe **design tools**: Flowcharts, Decision Tables, Decision Trees, Structured English.
7. Explain **characteristics and elements of a system**.

Unit II

8. Explain **Data Flow Diagram (DFD)** with symbols and levels.
9. Describe **Entity Relationship Diagram (ERD)** with examples.
10. Explain **input and output design principles**.
11. Explain **software testing types**.
12. Describe **effort and cost estimation methods**.
13. Explain **software maintenance process and types**.
14. Discuss **system implementation and conversion methods** in detail.
