Theory Assignment

Subject: Operating System

Chapter 1: Introduction to Operating System

Submission Date: 07/08/2026

Instructions:

1. Submit the assignment on or before the given date.

Assignment Questions

- Q1. Define an Operating System. Explain the objectives and functions of an Operating System.
- Q2. Explain different types of Operating Systems with their advantages and disadvantages:
- a) Batch Operating System
 - b) Multiprogramming Operating System
 - c) Time-Sharing Operating System
 - d) Parallel Operating System
- Q3. Explain the major components of an Operating System in detail.
- Q4. Define System Calls. Explain different types of system calls with suitable examples.
- Q5. What is a Process? Explain process management and different process states with a state transition diagram.
- Q6. Explain Process Control Block (PCB). Describe the information stored in a PCB.
- Q7. What is Context Switching? Explain the steps involved in context switching.
- Q8. Explain various operations performed on processes by an Operating System.
