

Software Testing

- 1) What types of errors can be uncovered by Black-Box and White-Box Testing?
A) Logic errors B) Performance errors C) Behavioral errors D) None of these
- 2) Which of the following comes under the Control Structure Testing?
A) Condition testing B) Loop testing C) Data Flow Testing D) All of these
- 3) 4) User Acceptance testing is a type of _____.
A) White box testing B) Black box testing C) system testing D) None of these
- 4) Which of the following is not a part of test plan?
A) Scope B) Mission C) Objective D) Risk
- 5) _____ is not a Software Test Life Cycle Phase?
A) Requirements Gathering B) Test Planning C) Test Closure D) Test Design
- 6) Which are the following characteristic of Exploratory Testing?
A) Minimum planning and maximum execution
B) Useful in situations with poor specification and limited time
C) Both A and B D) none of these
- 7) Testing is done without planning and documentation is called _____.
A) Unit testing B) Retesting C) Adhoc testing D) Regression testing
- 8) In the V model, testing starts in parallel with the development.
A) True B) False
- 9) Which is not a part of Decision Table?
A) Rule portion B) Driver portion C) Condition portion D) Action portion
- 10) Which is the following example of load testing?
A) Downloading large contents from the internet.
B) Running multiple applications on a computer or server simultaneously.
C) Printing large document using printer in a queue. D) All the above
- 11) Which of the following statements is true about reviews
A) Reviews are the least effective way of testing code.
B) Reviews cannot be performed on user requirements specifications.
C) Reviews are unlikely to find faults in test plans.
D) Reviews should be performed on specifications, code, and test plans.
- 12) Which of the following requirements is testable?
A) The system shall be user friendly.
B) The response time shall be less than one second for the specified design load.
C) The safety-critical parts of the system shall contain zero faults.
D) The system shall be built to be portable.
- 13) Test cases are designed during _____.
A) Test recording B) Test planning C) Test configuration D) Test specification
- 14) Testing beyond normal operational capacity is _____.
a) Load testing b) Performance testing c) Stress testing d) All of these
- 15) Before handing over the software to the client, which testing is to be done in-house?
a) Theta b) Beta c) Gamma d) Alpha
- 16) User Acceptance testing is a type of _____.
a) White box testing b) Black box testing c) system testing d) None of these
- 17) Which of the following is characteristic of Exploratory Testing?
a) Minimum planning and maximum execution
b) Useful in situations with poor specification and limited time
c) Both a and b d) none of these
- 18) What is the order in which test levels are performed?
a) Unit, Integration, System, Acceptance b) Unit, System, Integration, Acceptance
c) Unit, Integration, Acceptance, System d) System, Unit, Integration, Acceptance
- 19) Which testing is concerned with behavior of whole product as per specified requirements?
a) Acceptance testing b) Component testing c) System testing d) Integration testing
- 20) _____ is used to calculate the application's actions beyond normal or peak load conditions.

- a) Stress testing b) Load testing c) Volume testing d) None of these
- 21) _____ is not a Software Development Life Cycle Phase?
- a) Requirements Gathering b) Coding c) Test Closure d) Testing
- 22) Test cases are created in which phase?
- a) Test Specification b) Test Planning c) Test Requirement d) Test Configuration
- 23) Which of the following type of testing is done without planning and documentation?
- a) Unit testing b) Retesting c) Ad hoc testing d) Regression testing
- 24) Which of the following is not part of a test plan.
- a) Risks b) Incident Report c) Features to be tested d) Schedule
- 25) Writing a test summary report is major task of _____.
- a) Test Closure activity b) Implementation and execution
c) Evaluating exit criteria and Reporting d) Analysis and Design
- 26) Which of the following is not a part of test plan?
- a) Scope b) Mission c) Objective d) Risk
- 27) What is Cyclomatic complexity?
- A) Black box testing B) White box testing C) Yellow box testing D) Green box testing
- 28) Which of the following would not part of a test plan?
- A) Features to be tested B) Risks C) Incident reports D) Schedule
- 29) In which order test levels are performed _____.
- A) Unit, Integration, System, Acceptance B) Unit, System, Integration, Acceptance
C) Unit, Integration, Acceptance, System D) System, Unit, Integration, Acceptance
- 30) Boundary value analysis belongs to _____ testing.
- A) White Box B) Black Box C) Gray box D) system
- 31) Alpha testing is done at _____.
- A) Developer's end B) User's end C) Both A and B D) None of these
- 32) Which of the following testing types is not related to system testing?
- A) Recovery testing B) Random testing C) Usability testing D) Stress testing
- 33) _____ means an error in the software coding or in the program.
- A) Errors B) Failures C) Bugs D) Defects
- 34) Test suite of a program is a _____.
- A) Set of testing strategies B) Set of inputs with pre-conditions
C) Set of outputs with post-conditions D) Set of test cases
- 35) Effective testing will reduce _____ cost.
- A) Maintenance B) Design C) Coding D) Documentation
- 36) Which of the following testing cannot be performed on first build of the software?
- A) Regression testing B) Retesting C) Sanity testing D) All of these
- 37) Testing of software with actual data and in actual environment is known as _____.
- A) Regression testing B) Beta testing C) Alpha testing D) None of the above
- 38) **The regression testing should be performed _____.**
- A) After the software has changed B) As often as possible
C) When the environment has changed D) Both A and C
- 39) Which is not true regarding Smoke and Sanity Testing?
- A) Sanity Testing is also called tester acceptance testing.
B) When executing both, then first execute sanity testing tests and then smoke Testing.
C) Smoke and sanity tests can be executed using an automation tool.
D) Smoke testing performed on a particular build is known as a build verification test.
- 40) What is the main purpose of integration testing?
- A) Interface errors B) Design errors C) Procedure errors D) None of these
- 41) Testing of individual components by the developers are comes under _____ testing
- A) Integration B) Validation C) Unit D) User
- 42) Which of the following is not true in case of Soak Testing?
- A) Also know as Endurance Testing.
B) Running a system at high levels of load for prolonged periods of time.
C) Type of Performance Testing. D) Subset of Regression Testing.

- 43) Which of the following is not a part of Performance Testing?
 A) Measuring the LOC. B) Measuring Response Time.
 C) Measuring Transaction Rate. D) Measuring CPU Utilization.
- 44) Which of the followings are Experience Based Techniques?
 A) Error guessing B) Equivalent partitioning C) Exploratory testing D) Both A and C
- 45) _____ of test document is describes the Exit Criteria of Testing.
 A) Test Case B) Test Plan C) Test Summary Report D) Defect Report
- 46) _____ is not a Test Document.
 A) Test Policy B) Test Case
 C) PIN (Project Initiation Note) D) RTM (Requirements Traceability Matrix)
- 47) 21) Which of the following categories of errors find through Black-box testing?
 A) Incorrect or missing functions B) Interface errors
 C) Behavior or performance errors D) All of these
- 48) Which of the following is not component of Defect/Bug Report?
 A) Track Id B) Defect Id C) Status D) Defect Description
- 49) Which of the following is/are White box technique?
 A) Statement Testing B) Decision Testing
 C) Condition Coverage D) All of the these
- 50) Which of the following is not main objective of software testing?
 A) Finding defects B) Making absence of defects
 C) Gaining confidence about the level of quality D) Preventing defects
- 51) Which of the following characteristics of Exploratory Testing?
 A) Minimum planning and maximum execution.
 B) Useful in situations with poor specification and limited time.
 C) Test design and test execution are done in parallel.
 D) All of the above.
- 52) The approach/document used to make sure all the requirements are covered when writing test cases _____.
 A) Traceability Matrix B) Checklist C) Test Bed D) Test Matrix
- 53) Testing beyond normal operational capacity is _____.
 A) Volume testing B) Stress testing C) Load testing D) Soak Testing
- 54) _____ is not a Software Development Life Cycle Phase?
 A) Analysis B) Coding C) Test Plan D) Implementation
- 55) In the V model, testing starts in _____ with the development.
 A) Parallel B) After End C) Randomly D) Both A and C
- 56) Requirements Specification, Planning, Test case Design, Execution, Bug Reporting & Maintenance This phase of Life Cycle comes Under _____.
 A) SDLC B) STLC C) SQLC D) DLC
- 57) Exit criteria in test plan mentions _____.
 A) When to stop accepting new requirements
 B) When to stop the code from moving to production
 C) When to stop testing activities
 D) When to stop from accepting new pieces of code
- 58) Which of the following defect attribute indicates the order in which defects need to be fixed?
 A) Severity B) Complexity C) Intensity D) Priority
- 59) Executing the same test case by giving the number of inputs on same build called as _____.
 A) Regression Testing B) Retesting C) Adhoc Testing D) Sanity Testing
- 60) The focus of acceptance testing is _____.
 A) To find faults B) To ensure correctness of software
 C) To test integration related issues D) To test from the user's perspective
- 61) Which of the following are not characteristics of the review processes?
 A) Walkthrough- led by the author
 B) Informal code- documented
 C) Peer review - no management participation
 D) Inspection-uses entry and exit criteria led by a moderator or leader.

- 62) Acceptance test cases are based on _____.
 A) Design B) Code C) Requirements D) Decision
- 63) Statement Coverage will not check _____.
 A) Unused Branches B) Missing Statements C) Dead Code D) Unused Statement
- 64) In incremental integration testing, Hybrid testing is called as _____.
 A) Combination of top-down and bottom-up testing
 B) Combination of top-down or big bang testing
 C) Both A and B D) None of these
- 65) Structural testing belongs to _____ testing.
 A) System B) Black Box C) Gray box D) White Box
- 66) Alpha testing is done at _____.
 A) Developer's end B) User's end C) Both A and B D) None of these
- 67) Which of the following testing types is related to system testing?
 A) Security testing B) Regression testing C) Usability testing D) All of these
- 68) Software mistakes during coding are known as _____.
 A) Errors B) Bugs C) Failures D) Defects
- 69) Testing process contains _____.
 A) Test Plan B) Test Cases C) Test Status D) All of these
- 70) Testing of individual components by the developers to find defects and errors is called as _____.
 A) Integration testing B) System testing C) Unit testing D) None of these
- 71) _____ is performed on the Software Build to make sure that the most important and critical functionalities of the application are working fine or not.
 A) Regression testing B) Smoke Testing C) Sanity testing D) Alpha testing
- 72) In _____ phase we create the test case.
 A) Test Specification B) Test Planning C) Test Requirement D) Test Configuration
- 73) Which of the following situations regression testing is not performed _____.
 A) when project manager asks to perform
 B) when new functionality is introduced
 C) when database system is changed
 D) when system is installed on different hardware configuration than previously tested.
- 74) Which of the following is not a type of non-functional testing?
 A) Performance B) Usability C) State-Transition D) Security
- 75) Who are the person involved in a formal review?
 A) Manager B) Moderator C) Scribe D) All of these
- 76) _____ testing is performed to expose defects in interfaces and interaction between added components.
 A) Integration B) System C) Unit D) Smoke
- 77) _____ is a type of performance test that verifies a system's stability and performance characteristics over an extended period of time.
 A) Adhoc testing B) Path testing C) Soak testing D) Regression testing.
- 78) Which of the following is not a part of Performance Testing?
 A) Recovery testing B) Measuring Response Time.
 C) Measuring Transaction Rate. D) Simulating many users
- 79) Which of the following is not a static testing technique?
 A) State transition B) Error guessing C) Both A and B D) Walkthrough
- 80) Which of the following is not decided in the test planning phase?
 A) Schedule and deliverables B) Hardware and Software
 C) Entry and exit criteria D) Types of test cases
- 81) _____ is used to trace the requirements to the tests that are needed to verify whether the requirements are fulfilled.
 A) Test Policy B) Bug Report
 C) Project Initiation Note D) Requirements Traceability Matrix
- 82) Which of the following is a black box design technique?
 A) statement testing B) loop testing C) equivalence partitioning D) usability testing
- 83) Which of the following is component of Defect/Bug Report?
 A) Defect Description B) Defect Id C) Status D) All of these

- 84) Which of the following is not White box technique?
- Statement Testing
 - Use case Testing
 - Condition Coverage
 - Both A and C
- 85) Which of the following is objectives of software testing?
- Finding defects
 - Make sure user requirement fulfilled.
 - Improve software quality and reduce maintaince cost
 - All of these
- 86) What is the purpose of test completion criteria in a test plan_____.
- to plan when to stop testing
 - to ensure that the test case specification is complete
 - to know when test planning is complete
 - to know when a specific test has finished its execution
- 87) _____ contains the execution detail and the result of test execution.
- Test Checklist
 - Test execution report
 - Bug Report
 - Test Matrix
- 88) Testing with large number of data _____.
- Volume testing
 - Stress testing
 - Load testing
 - Soak Testing
- 89) _____ is a phase of Software Development Life Cycle.
- Analysis
 - Coding
 - Both A and B
 - Test Plan
- 90) In the _____ model, testing starts parallel with the beginning of development phase.
- Waterfall
 - V-process
 - RAD
 - Spiral
- 91) New, Assigned, Verified, Closed, Reopened, Deferred, Rejected, and Postponed this phase of Life Cycle comes under _____.
- SDLC
 - STLC
 - DLC
 - SQLC
- 92) Which of the following is major tasks of Test planning activity?
- Determine Test approach
 - Determine required test resources
 - Determine scope and risks and identify objectives of testing
 - All of these
- 93) How harshly the bugs effecting the application is called as_____.
- Severity
 - Complexity
 - Intensity
 - Priority
- 94) Retesting the entire software application after a change has been made called as_____ testing.
- Unit regression
 - Regional Retesting
 - Full regression
 - Sanity Testing
- 95) The purpose of requirement phase is_____.
- To business requirements
 - To understand user needs
 - To define the scope of testing
 - All of the above
- 96) _____ testing an application under extreme workloads to see how it handles high traffic or data processing.
- Volume testing
 - Stress testing
 - Load testing
 - Soak Testing
- 97) Which of the following is the Review Technique?
- Inspection
 - Walkthrough
 - Both A and B
 - None of these
- 98) Which should be the first test case for the login screen of the website?
- Check the URL of the login screen is working.
 - Check the field validation of the username and password.
 - Check that password must be visible in encrypted form.
 - Label of the user name and password field must be visible.
- 99) Which of the following is disadvantage of Spiral Model?
- Doesn't work well for smaller projects
 - High amount of risk analysis
 - Strong approval and documentation control
 - Additional Functionality can be added at a later date
- 100) Which is not the functional test case of the pencil?
- If eraser is attached properly
 - The pencil should not be sharpened
 - Easy to sharpen
 - Length and breadth of the pencil
- 101) Which of the following is a type of non-incremental integration testing approach?
- Big-bang
 - Top down
 - Bottom up
 - Functional incrimination
- 102) Which of the following is a form of functional testing?
- Usability testing
 - Boundary value analysis
 - Performance testing
 - Security testing
- 103) Evaluating testability of the requirements and system are a part of which phase_____.

- A) Test Analysis and Design B) Test Planning and control
C) Test Implementation and execution D) Evaluating exit criteria and reporting
- 104) In software development process, testing process start after _____.
A) When the code is complete
B) When the design is complete
C) When the software requirements have been approved
D) When the first code module is ready for unit testing
- 105) Which testing is concerned with behavior of whole product as per specified requirements?
A) Acceptance testing B) Component testing C) System testing D) Integration testing
- 106) Which of these activities provides the biggest potential cost saving from the use of CAST?
A) Test management B) Test execution C) Test design D) Test planning
- 107) Which of the following would not normally form part of a test plan?
A) Incident reports B) Risks C) Features to be tested D) Schedule
- 108) Beta testing done at _____.
A) User side B) Developer side C) Both A and B D) Tester
- 109) _____ Technique is used when different combination of input requires different combination of actions.
A) Boundary Value Analysis B) Decision Table testing
C) Equivalence Partition D) Decision Coverage
- 110) In _____ the testing phase starts after the Development phase.
A) RAD model B) Waterfall model C) Prototype model D) Spiral model
- 111) Defects generally divide into the following categories?
A) WRONG B) MISSING C) EXTRA D) All the above
- 112) Testing beyond normal operational capacity is _____.
a) Load testing b) Performance testing c) Stress testing d) All of these
- 113) Before handing over the software to the client, which testing is to be done in-house?
a) Theta b) Beta c) Gamma d) Alpha
- 114) User Acceptance testing is a type of _____.
a) White box testing b) Black box testing c) system testing d) None of these
- 115) Defect reports are useful as they contain _____.
a) defect description b) Priority c) Summary d) All of the above
- 116) Test cases needs to be written for _____.
a) Valid and unexpected conditions b) Valid and expected conditions
c) Both a and b d) only b
- 117) _____ non incremental testing approach takes place all the modules are integrated in one shot in the system.
a) Big bang b) Hybrid c) Unit d) System
- 118) Writing a test summary report is a major task of _____.
a) Test Closure activity b) Planning and Control
c) Evaluating exit criteria and Reporting d) Analysis and Design
- 119) _____ monitoring defects from the time of recording to satisfactory resolved.
a) Quality measurement b) Defect tracking
c) Defect measurement d) testing report
- 120) What are main attributes of automation testing?
a) Time saving b) Correctness c) More reliable d) All of these
- 121) Which of the following items isn't a Standard part of the Test Plan document?
a) Schedules and deadlines b) Quality plans c) Test environments d) Test items
- 122) Which of the following is not included in System testing?
a) Performance services b) Security services c) Monitoring services d) Usability services
- 123) Which of the following is characteristic of exploratory testing?
a) Minimum planning and maximum execution
b) Useful in situations with poor specification and limited time
c) Test design and test execution are done in parallel
d) All of the above

- 124) _____ Testing is verifies software's ability to recover from failures like software/hardware crashes, network failures.
- a) Recovery b) Integration c) System d) Usability
- 125) Which of the following is characteristic of Exploratory Testing?
- a) Minimum planning and maximum execution
b) Useful in situations with poor specification and limited time
c) Both a and b d) none of these
- 126) What is the order in which test levels are performed?
- a) Unit, Integration, System, Acceptance b) Unit ,System, Integration, Acceptance
c) Unit, Integration, Acceptance, System d) System, Unit, Integration, Acceptance
- 127) Which testing is concerned with behavior of whole product as per specified requirements?
- a)Acceptance testing b)Component testing c)System testing d)Integration testing
- 128) _____ is used to calculate the application's actions beyond normal or peak load conditions.
- a) Stress testing b) Load testing c) Volume testing d) None of these
- 129) _____ is not a Software Development Life Cycle Phase?
- a) Requirements Gathering b) Coding c) Test Closure d) Testing
- 130) Test cases are created in which phase?
- a) Test Specification b) Test Planning c) Test Requirement d) Test Configuration
- 131) Which of the following type of testing is done without planning and documentation?
- a) Unit testing b) Retesting c) Ad hoc testing d) Regression testing
- 132) Which of the following is not part of a test plan.
- a) Risks b) Incident Report c) Features to be tested d) Schedule
- 133) Writing a test summary report is major task of _____.
- a) Test Closure activity b) Implementation and execution
c) Evaluating exit criteria and Reporting d) Analysis and Design
- 134) Which of the following is not a part of the Test Implementation and Execution Phase?
- A) Creating test suites from the test cases
B) Executing test cases either manually or by using test execution tools
C) Comparing actual results
D) Designing the Tests
- 135) A logical collection of test cases which naturally work together is called as _____.
A) Test Script B) Test Condition C) Test Suite D) Test Data
- 136) Which of the following is a major task of test planning?
- A) Initiating corrective actions B) Scheduling test analysis and design tasks
C) Monitoring progress and test coverage D) Measuring and analyzing results
- 137) To check whether the system meets the non-functional requirements identified in the SRS document, which testing is done in _____.
- a) Integration testing b) Unit testing c) Performance testing d) Both a and b
- 138) _____ is a appearance of an error.
- a) Error b) Failure c) Test suite d) Test case
- 139) Cyclomatic complexity is a _____.
a) White box testing technique
b) Black box testing technique
c) Gray box testing technique
d) None of the above
- 140) Which of the following is not a part of test plan?
- a) Scope b) Mission c) Objective d) Risk
- 141) Who determines the severity of bug?
- a) Developer b) Customer c) Tester d) All stakeholders
- 142) Which is not true in case of Soak Testing?
- a) Also known as Endurance Testing
b) Running a system at high levels of load for prolonged periods of time.
c) Type of Performance Testing
d) Subset of Regression Testing
- 143) Smoke testing is _____.

- a) To find out hardware burn out
c) To build software is stable
- b) Same as build verification test
d) Regression Testing
- 144) Which is not the state of bug in bug Life Cycle?
a) Verified b) Deferred c) Critical d) Postponed
- 145) _____ Testing to changing workloads to measure and evaluate the performance and ability of the target and test to continue to function properly under these different workloads.
a) Load b) Integration c) System d) Usability
- 146) _____ testing is done to analyze the system performance by increasing the volume of data in the database.
a) Recovery b) Volume c) Regression d) Integration
- 147) Black-box testing is _____.
A) Testing without knowledge of the internal system of the code
B) Testing using small black boxes to record the test results
C) Testing using very small handheld computers which are black
D) Testing with knowledge of the internal structure of the code
- 148) Alpha testing is done at _____.
A) Developer's end B) User's end C) Both A and B D) None of these
- 149) _____ ensures that no new defects been introduced after the modification in the code.
A) Integration testing B) Regression testing C) System testing D) Acceptance testing
- 150) Which of the followings are Experience Based Techniques?
A) Error guessing B) Equivalent partitioning C) Exploratory testing D) Both A and C
- 151) Which of the following is not attributes Test Case template?
A) Test Priority B) Defect ID C) Test steps D) All of these
- 152) Which of the following is a typical objective of testing?
A) To find defects and failures B) To validate the project plan works as required
C) Both A and D D) Comparing actual results with expected results
- 153) Loop testing is a control structure testing technique where the criteria used to design test is that they _____.
A) rely basis path testing
B) exercise the logical conditions in program module
C) select test paths based on the locations and uses of variables
D) focus on testing the validity of loop constructs
- 154) Which of the following is not included in the Test Plan document?
A) Test data B) Quality plans C) Test environments D) Schedules and deadlines
- 155) Retesting the entire application after a change has been made called as _____ testing.
A) Full Regression B) Unit Regression C) Regional Regression D) Retesting
- 156) _____ Software Development Life cycle model will require starting testing Activities when starting development activities itself.
A) Waterfall B) V-process C) Spiral D) RAD
- 157) A Person who documents all the issues, problems, and open points that were identified during a formal review.
A) Manager B) Moderator C) Scribe D) Author
- 158) The purpose of requirement phase is _____.
A) To problem identifications B) To understand user needs
C) To define the scope of system D) All of the above
- 159) _____ is not a Test Level?
A) System Testing B) Acceptance Testing C) Functional Testing D) Integration Testing
- 160) Which of the following is a type of Performance Testing?
A) Load testing B) Stress testing C) Soak testing D) All of these
- 161) Which one of the following is not included in a test summary report?
A) Defining pass/fail criteria and objectives of testing
B) Deviations from the test approach
C) Measurements of actual progress against exit criteria
D) Evaluation of the quality of the test object
- 162) Which of the following is not major component of writing test plan?
A) Plan Test Environment B) Determine Test Deliverables
C) Bug Report D) Design the Test Strategy

- 163) _____ is a document that is created at the beginning of a project and lists all the requirements.
 A) Test plan B) Requirements Traceability Matrix C) Test Matrix D) Both A and C
- 164) A “password fields” on a login form contains a text box that accepts alphanumeric values. Identify which of the following is valid equivalence class.
 A) UNIVERSITY B) University C) Univer12sity D) university%
- 165) A test design technique is _____.
 A) a process for selecting test cases B) a process for determining expected outputs
 C) a way to measure the quality of software D) a way to measure test plan what has to be done
- 166) Which is most true of exploratory testing?
 A) It is random testing.
 B) The results are never documented
 C) It is most helpful when the expected behavior of the application is unknown or undefined.
 D) It is defined by a very exact process
- 167) Which of the following statement is true about the relationship between statement coverage and decision coverage?
 A) 100% decision coverage also guarantees 100% statement coverage
 B) 100% statement coverage also guarantees 100% decision coverage
 C) 50% decision coverage also guarantees 50% statement coverage
 D) Decision coverage can never reach 100%
- 168) Which of the following is a disadvantage of Spiral Model?
 A) High amount of risk analysis
 B) Doesn't work well for smaller projects
 C) Strong approval and documentation control
 D) Additional Functionality can be added at a later date
- 169) Which of the following defines the expected results of a test?
 A) Test case specification B) Test design specification
 C) Test procedure specification D) Test results
- 170) The goal of acceptance testing is to _____.
 A) Establish confidence in the system, parts of the system or specific non-functional characteristics of the system.
 B) Find as many functional defects as possible
 C) Assess the adequacy of component testing
 D) Give users training in using a new system
- 171) Which of the following field is used in Defect report?
 A) Name of tester B) Priority C) Summary D) All of the above
- 172) What is the main task of test planning?
 A) Measuring and analyzing results B) Evaluating exit criteria and reporting
 C) Determining the test case approach D) Preparing the test specification
- 173) Bug status is set to postpone due to _____.
 A) Data may be unavailable B) The bug may not be the major effect in the software
 C) Lack of time for the release D) Priority of that bug may low
- 174) _____ report contains the execution detail and comparing expected and actual results.
 A) Test Document B) Test execution C) Test Quality D) Test Summary
- 175) Which of the following defect attribute denotes the order in which defects need to be fixed?
 A) Priority B) Complexity C) Intensity D) Severity
- 176) Which of the following is not part of system testing _____.
 A) top-down integration testing B) performance, load and stress testing
 C) requirements-based testing D) usability testing
- 177) What is the example of Load Testing?
 a) Downloading large contents from the internet
 b) Running multiple applications on a computer
 c) Printing large document using printer in a queue
 d) All the above
- 178) The main focus of acceptance testing is _____.
 a) finding faults in the system
 b) ensuring that the system is acceptable to all users

- c) testing for a business point of view
 - d) testing the system with other systems
- 179) Test cases are designed during _____
- a) test recording
 - b) test planning
 - c) test configuration
 - d) test specification
- 180) Beta testing will be done at _____.
- a) User side
 - b) Developers side
 - c) Both a and b
 - d) None of these
- 181) Requirements Specification, Planning, Test case Design, Execution, Bug Reporting & Maintenance, This phase is part of _____.
- a) Software Development Life Cycle
 - b) Software Test Life Cycle
 - c) Software Quality Life Cycle
 - d) Bug Life Cycle
- 182) Effective testing will reduce _____ cost?
- a) maintenance
 - b) design
 - c) coding
 - d) documentation
- 183) Which of the following is not a part of bug report?
- a) Test case
 - b) Output
 - c) Software Version
 - d) LOC
- 184) Exit criteria is determined during _____.
- a) Test Closure activity
 - b) Implementation and execution
 - c) Planning and Control
 - d) Evaluating exit criteria and Reporting
- 185) Manual Testing is _____.
- a) Done at least performed
 - b) Costly
 - c) Required experts in programming
 - d) All of these
- 186) The _____ used to make sure all the requirements are covered when write test cases.
- a) Test Matrix
 - b) Checklist
 - c) Test bed
 - d) Traceability Matrix
- 187) When writing the good and effective test cases you need _____.
- A) Identify the Scope and Purpose of Testing
 - B) Identify Non-Functional Requirements
 - C) Define the Test Case Framework
 - D) All of these
- 188) Confidence Testing refers to _____.
- A) Volume testing
 - B) Smoke testing
 - C) Load testing
 - D) Soak Testing
- 189) Which is not a type of Review?
- A) Inspection
 - B) Walkthrough
 - C) Technical
 - D) Requirement Analysis
- 190) Which should be the first test case for the login of Gmail account?
- A) Check the URL of the login is working
 - B) Check the field validation of the username and password
 - C) Check that password must be visible in encrypted form
 - D) Label of the user name and password field must be visible
- 191) Which of the following is a types of Ad-hoc testing?
- A) Pair testing
 - B) Monkey testing
 - C) Buddy testing
 - D) All of these
- 192) Which is not the functional test case of the pencil?
- A) The pencil should not be sharpened
 - B) If eraser is attached properly
 - C) Easy to sharpen
 - D) Length and breadth of the pencil
- 193) In bottom-up incremental integration approach, when one or more modules are not developed but it required to test some other module that time _____ is used as a dummy module or code.
- A) Stubs
 - B) Drivers
 - C) Both A and B
 - D) interface module
- 194) Which of the following is not a state of a Bug in Bug Life Cycle?
- A) Deferred
 - B) Critical
 - C) Verified
 - D) Closed
- 195) Exit criteria in test plan indicates _____.
- A) When to stop accepting new requirements
 - B) When to stop the code from moving to production
 - C) When to stop testing activities
 - D) When to stop from accepting new pieces of code
- 196) Which of the following is not a job responsibility of a software tester?
- A) Identifying test cases
 - B) Preparing test data
 - C) Executing tests
 - D) Writing the functional specifications

- 197) Which is not true in case of Soak Testing?
- A) Also known as Endurance Testing.
 - B) Running a system at high levels of load for continued periods of time.
 - C) Type of Performance Testing.
 - D) Subset of Regression Testing
- 198) Which of the following is not a part of test plan?
- A) Scope
 - B) Mission
 - C) Objective
 - D) Risk
- 199) Which of the following is not a category of defect?
- A) Wrong
 - B) Missing
 - C) Extra
 - D) Critical
- 200) _____ is a condition that causes a system to fail in performing its required function.
- A) Error
 - B) Fault
 - C) Failure
 - D) Defect
- 201) If a software testing team is doing testing without Planning and Documentation, then this type of testing is called as, _____ testing.
- A) Adhoc
 - B) Spike
 - C) Regression
 - D) Unit
- 202) Early defects detection are _____.
- A) Costly to find and difficult to fix
 - B) Cheap to find and easy to fix
 - C) Costly to find and easy to fix
 - D) Cheap to find and difficult to fix
- 203) Which of the following statements are true for the equivalence partitioning test technique?
- A) Divides possible inputs into classes that have the same behavior
 - B) Can be used to create both positive and negative test cases
 - C) Makes use of only positive test cases for the equivalence partitions
 - D) Both A and B
- 204) Which of the following major purpose of defects?
- A) To correct the defect
 - B) To report status of the application
 - C) To improve the software development process
 - D) All of these
- 205) A _____ is a collection of related Test Cases.
- A) Test Suite
 - B) Test Condition
 - C) Test Script
 - D) Test Data
- 206) Which of the following is not decided in the test-planning phase?
- A) Schedules and deliverables
 - B) Hardware and software
 - C) Entry and exit criteria
 - D) Types of test cases
- 207) A testing which checks the internal logic of the program is _____.
- A) System
 - B) Black Box
 - C) Gray box
 - D) White Box
- 208) Beta testing is done at _____.
- A) Developer's end
 - B) User's end
 - C) Both A and B
 - D) None of these
- 209)
- 210) 6) Which testing is concerned with behavior of whole product as per specified requirements?
- A) Integration testing
 - B) Regression testing
 - C) System testing
 - D) Acceptance testing
- 211) Which of the following is a characteristic of Exploratory Testing?
- A) Minimum planning and maximum execution
 - B) Useful in situations with poor specification and limited time
 - C) Test design and test execution are done in parallel
 - D) All of the above
- 212) Which is not a part of Decision Table Testing?
- a) Action portion
 - b) Driver portion
 - c) Condition portion
 - d) None of these
- 213) Which of the followings is/are characteristics of Stress Testing?
- a) Type of Non Functional Testing
 - b) Testing beyond normal operational capacity, frequently breaking point, observe the results
 - c) Determine the stability of a given system
 - d) All of the above
- 214) If a software testing team is doing testing without Planning and Documentation, then this type of testing is called as, _____.
- a) Unit testing
 - b) Regression testing
 - c) Adhoc testing
 - d) None of these
- 215) _____ describes any guiding or corrective actions taken as a result of information and metrics gathered and reported.
- a) Test control
 - b) Test monitoring
 - c) Test reporting
 - d) Configuration management

- 216) Retesting of a single program or component after a change has been made_____.
- a) Full Regression Testing b) Unit Regression c) Regional Regression d) None of these
- 217) Which of these can be tested using Loop Testing?
- a) Simple Loops b) Nested Loops c) Concatenated Loops d) All of these
- 218) Which of the following are the objectives of Software Testing?
- a) Determines that software product satisfy specified users requirements
b) software products is higher quality
c) Detect defects
d) All the above
- 219) _____ testing to find incorrect or missing functions, errors in data structures or external database access, interface errors, Performance errors and initialization and Termination errors.
- a) White Box b) Grey Box c) Black Box d) Red Box
- 220) What are the Types of Integration Testing?
- a) Hybrid Testing b) Bottom Up Testing c) Top Down Testing d) All the above
- 221) Informing to the developer which bug to be fix first is called as_____.
- a) Severity b) Priority c) Fix ability d) Traceability
- 222) Which of the following is attributes Test Case template?
- A) Test Priority B) Test case ID C) Test Environment D) All of these
- 223) Which of the following is a main task of test closure?
- A) Finalizing and archiving testware
B) Writing a test summary report
C) Assessing the need for additional tests
D) Ensuring proper environment setup
- 224) _____ is a process to check whether the software application is stable or not during the critical functionalities of application.
- A) Regression testing B) Smoke Testing C) Sanity testing D) Alpha testing
- 225) Reviewing the test Basis is a part of which phase_____.
- A) Test Analysis and Design B) Test Implementation and execution
C) Test Closure Activities D) Evaluating exit criteria and reporting
- 226) The difference between re-testing and regression testing is_____.
- A) Re-testing ensures the original fault has been removed; regression testing looks for unexpected side-effects.
B) Re-testing looks for unexpected side-effects; regression testing ensures the original fault has been removed
C) Re-testing is done by developers; regression testing is done by independent testers
D) Re-testing is done after faults are fixed; regression testing is done earlier
- 227) Which of the following is not a type of loop testing?
- A) Nested loop B) Concatenated loop C) Unstructured loop D) None of these
- 228) Who leads a formal review process?
- A) Manager B) Moderator C) Scribe D) Author
- 229) _____ testing will start after completion of unit testing.
- A) Integration B) System C) Acceptance D) Smoke
- 230) _____ testing means testing of software without any specific plans and schedules.
- A) Soak B) Path C) Exploratory D) Regression
- 231) Which of the following is a part of Performance Testing?
- A) Measuring Throughput B) Measuring Response Time.
C) Measuring Transaction Rate. D) All of these
- 232) Functional system testing is_____.
- A) Testing system functions with other systems
B) Testing the end to end functionality of the whole system
C) Testing that the components that comprise the system function together
D) Testing the system performs functions within specified response times
- 233) _____ contains the execution detail and the result of test execution.
- A) Test Checklist B) Test execution report C) Bug Report D) Test Matrix
- 234) Which document helps you to track requirement test coverage?
- A) Traceability Matrix B) Test plan C) Test Matrix D) Both A and D
- 235) Which of the following is not a white box design technique?

- A) Statement testing B) loop testing C) equivalence partitioning D) Both A and B
- 236) Which of the following is not a part of the Test Implementation and Execution Phase?
- A) Creating test suites from the test cases
B) Executing test cases either manually or by using test execution tools
C) Comparing actual results
D) Designing the Tests
- 237) Which of the following are advantages of a black box testing?
- A) More effective than white box testing B) tester and programmer are independent of each other
C) Both A and B D) Chances of repetition of test cases
- 238) Which of the following are needs of regression testing?
- A) Adding new functionalities B) Fixing performance issue
C) Improve software quality and reduce maintaince cost D) All of these
- 239) Early defects detection are _____.
- A) Costly to find and difficult to fix B) Cheap to find and easy to fix
C) Costly to find and easy to fix D) Cheap to find and difficult to fix
- 240) _____ must be developed to describe when and how testing will occur.
- A) Test Strategy B) Test Plan C) Test Design D) None of these
- 241) Which of the fallowing are needs of volume testing?
- A) Check if the data is stored correctly or not
B) Check if there is any data loss
C) Check whether high volume data affects the speed of processing
D) All of these
- 242) Defect reports are useful as they contain_____.
- A) Name of tester B) Priority C) Summary D) All of the above
- 243) Which of the following common problems of automation testing?
- A) Changing requirements B) Lack of time C) Both A and B D) None of these
- 244) Which of the following is/are White box technique?
- a) Statement Coverage b) Decision Coverage c) Condition Coverage d) All of these
- 245) What are the various Testing Levels?
- a) Unit Testing b) System Testing c) Integration Testing d) All of these
- 246) What is the main purpose of integration testing?
- a) Design errors b) Interface errors c) Procedure errors d) None of these
- 247) Which of the following is not a part of Performance Testing?
- a) Measuring Transaction Rate
b) Measuring Response Time
c) Measuring the LOC
d) None of the above
- 248) Which of the followings are Specification Based Techniques?
- a) Error guessing b) Equivalent partitioning c) Decision table testing d) Both a and c
- 249) Regression testing should be performed_____.
- a) When the environment has changed
b) After the software has changed
c) Both B and C
d) Every week
- 250) _____is not a Software Test Life Cycle Phase?
- a) Requirements Gathering b) Test Planning c) Test Closure d) Test Design
- 251) Which Test Document describes the Exit Criteria of Testing?
- a) Test Case b) Test Plan c) Test Summary Report d) Defect Report
- 252) _____ testing is to be done in-house before software delivery to the client.
- a) Alpha b) Beta c) Gamma d) Theta
- 253) In which of the following testing techniques, experience of tester is beneficial?
- a) Error guessing b) unit testing c) Both a and b d) None of these
- 254) Defect Tracking _____.
- A) Is interface between testing team and development team
B) Is interface between the testing team and end users

- C) Both A and B
- D) None of these

- 255) _____ is a document which contains summary of test activities and final test results.
A) Test Document B) Test summary report C) Quality report D) All of these
- 256) Informing to the developer which bug to be fix first is called as _____.
A) Priority B) Complexity C) Intensity D) Severity
- 257) Which of the following is a type of regression testing?
A) Unit regression B) Regional regression C) Full regression D) All of these
- 258) When customers say quality of the product is too good?
A) Software meets its defined specification B) Software is technically excellent
C) Software fulfills expectations of customer D) Software has few bugs
- 259) _____ is used to calculate the application's actions beyond normal or peak load conditions.
A) Volume testing B) Stress testing C) Load testing D) Soak Testing
- 260) What type of review requires formal entry and exit criteria, including metrics?
A) Inspection B) Walkthrough C) Both A and B D) Management review
- 261) Which should be the first test case for the login screen of the Social media website?
A) Check the URL of the login screen is working
B) Check the field validation of the username and password
C) Check that password must be visible in encrypted form
D) Label of the user name and password field must be visible
- 262) Ad-hoc testing also known as _____.
A) Random testing B) Monkey testing C) Both A and B D) Spike testing
- 263) Which is not the functional test case of the pencil?
A) If eraser is attached properly B) The pencil should not be sharpened
C) Easy to sharpen D) Length and breadth of the pencil
- 264) In top-down incremental integration approach, when one or more modules are not developed but it required to test some other module that time _____ is used as a dummy module or code.
A) Stubs B) Drivers C) Both A and B D) interface module
- 265) _____ technique to improve equivalence partitioning by focusing on the values at the ends of each partition or class.
A) Equivalence Class Partitioning B) Boundary value analysis
C) Use case testing D) Decision table testing
- 266) Which of the following is the correct sequence to test execution?
A) Set up Test environment, Identify test cases and test cycles, Review test results, Assign test scripts
B) Identify test cases and test cycles, Assign test scripts, Set up Test environment, Review test results
C) Set up Test environment, Identify test cases and test cycles, Assign test scripts, Review test results
D) None of these
- 267) When writing the good and effective test cases you need _____.
A) Identify the Scope and Purpose of Testing B) Identify Non-Functional Requirements
C) Define the Test Case Framework D) All of these
- 268) _____ is used to test and verify that it can continue handle a huge amount of volume load for an extended period of time.
A) Soak testing B) Stress testing C) Load testing D) Volume testing
- 269) A test design technique is _____.
A) Measure test plan B) Process for determining expected outputs
C) Process for selecting test cases D) Measure the quality of software
- 270) Which of the following is a category of defect?
A) Wrong B) Missing C) Extra D) All of these
- 271) Unit testing is done by _____.
A) User B) Developer C) Customer D) None of these
- 272) A set of inputs, execution preconditions and expected outcomes is known as a _____.
A) Test plan B) Test document C) Test case D) Test Suite
- 273) What is the purpose of exit criteria?

- A) When a set of tests has achieved a specific pre condition
- B) Define when to stop testing
- C) End of test level
- D) All of these

274) Which of the following is not a state of a Bug in Bug Life Cycle?

- A) Deferred
- B) Critical
- C) Verified
- D) Closed
