Assignment No – 4

1) Consider following scenario to solve by using algorithm

Process	Priority	Arrival Time	Running Time
P1	10	0	5
P2	20	1	4
P3	30	2	2
P4	40	4	1

1) Using FCFS algorithm

2) Using SRTF algorithm Preemptive mode (Unit interval - 1)

3) Using Priority Scheduling Algorithm (Preemptive Mode)
(Criteria lesser no higher priority)

2) Consider following scenario to solve by using algorithm

Process	Priority	Arrival Time	Burst Time
P1	2	0	4
P2	3	1	3
P3	4	2	1
P4	5	3	5
P5	5	4	2

1)Using FCFS algorithm

2)Using SJF with Preemptive Mode (Unit interval - 1).

3)Using Priority Scheduling Algorithm (Preemptive Mode)
(Criteria higher no higher priority)

3) Consider following scenario to solve by using algorithm

Process	Priority	Arrival Time	CPU Time
P1	3	0	8
P2	4	5	2
P3	4	1	7
P4	5	6	3
P5	2	8	5

1)Using Round Robin Algorithm

(Time Slice-3 Millisecond)

2)Using SJF with Preemptive Mode.

3)Using Priority Scheduling Algorithm (Preemptive Mode)
(Criteria Lesser no higher priority)

4) Consider following scenario to solve by using algorithm

Process	Priority	Arrival Time	CPU Time
P1	3	0	5
P2	4	1	4
P3	4	2	2
P4	5	4	1

1)Using Round Robin Algorithm algorithm

(Time quantum -2 Second)

2)Using SRTF algorithm.

3)Using Priority Scheduling Algorithm (Preemptive Mode)

(Criteria higher no lesser priority)
